Technical Skills:

- **Languages:** JavaScript, TypeScript, C, C++, Java (*I have fundamental & Functional Knowledge about C, C++ & Java.*).
- **IT Constructs:** Data Structures and Algorithms, OOPS, OS, Computer Networking & DBMS.
- **Web Development:** HTML, CSS, Tailwind, JS, TS, DOM Manipulation, Async JS, RegExp, React, Redux, Zustand, MUI, APIs, Node.JS, Express, REST APIs, Mongoose, CRUD Operations, Next.JS, Git & Version Control.
- **WebDAV Tools:** VSCode, Postman, Chrome DevTools, GitHub, Figma, Canva, Netlify.
- **Frameworks & Library:** Tailwind, MUI, React, Express, Next (*with Type safety*).
- **Database:** MongoDB.

Education:

- **College:** BCA Computer Science | I P College Campus 2, Bulandshahr | 1st division (2021-2024).
- **Certificate:**
 - ❖ Data Structures and Algorithms & C++ | Alpine Computer Academy, Bulandshahr | 'A'.
 - ❖ Front End Development | Divine Coding Classes | 'A+'.
- **School:**
 - ❖ Intermediate | Vivekananda Saraswati Vidya Mandir Inter College, DM Road, Bulandshahr | 1st division (2020-2021).
 - ❖ High School | | Vivekananda Saraswati Vidya Mandir Inter College, DM Road, Bulandshahr | 1st division (2018-2019).

Projects:

- **Snake Game:** Created a basic web game using HTML, CSS, and JavaScript focused on DOM manipulation. The project demonstrates core JavaScript logic, event handling, and interactive UI with minimal styling.
- **Spotify Clone:** Built a Spotify clone frontend using React, Vite, TypeScript, and React Router DOM, featuring dynamic routing and responsive UI.
- **YouTube Clone:** Built a YouTube clone using React, Vite, TypeScript, React Router DOM, and YouTube APIs, featuring video categories and dynamic routing.
- **MERN Storage App:** Built a MERN stack storage app with basic cookie-based authentication and user access control. Backend developed using Node.js, Express, MongoDB, and REST APIs. Frontend created with Vite, React, and React Router DOM, with file handling and responsive UI.
- **Terminal Based Chat Application:** Built a real-time terminal-based chat application using Node.js net module without external frameworks. Implemented user registration, public/private messaging, and admin commands via TCP sockets. Demonstrated strong understanding of socket programming, event-driven architecture, and multi-client communication.
